

"LIFTING TAPE"

Made in the U.K

IT COSTS YOU MORE TO CLEAN UP THAN A POT OF LIFTING TAPE

A Revolutionary New & Re-Useable Product for easier Masking and Painting around window seals. Save time Save Money!

Easily applied by hand – gives an outstanding professional finish. Save time, \$ *money* and *labour*. All this is possible because of its unique, flexible, triangular shape. LIFTING TAPE is designed for use in low bake ovens. For use on bonded or fixed screen rubbers of many vehicles and easily applied to rounded corners.

Applications – Simply withdraw the required length of LIFTING TAPE from the container. Holding the LIFTING TAPE so that the apex is facing away from you. Then using the tapered edge insert the LIFTING TAPE between the rubber and the work surface until the opposite corner taper of the LIFTING TAPE is flush with the free edge of the rubber. The rubber is now lifted so that you can refinish beyond where the rubber rests for a more professional finish.

The Result – Less cleanup work on completion.

Patent No.

U.K 2254023

U.S.A 2254023

S.A 92/2622

- ***A RANGE OF SIZES IS AVAILABLE.***
- ***ALL UNITS ARE SUPPLIED COILED IN HANDY PLASTIC POTS WITH LIDS FOR STORAGE AND DISPLAY.***
- ***6 PACK STARTER KITS ARE ALSO AVAILABLE, CONTAINING ONE OF EACH SIZE.***
